

WhitePaper

\$TOILET: THE OFFICIAL WHITEPAPER

“The Flush Protocol”

Solana Blockchain — 2025

COVER PAGE

\$TOILET
THE FLUSH PROTOCOL

“Some Degens Just Want to Watch The Rugs Burn”

- *Inspired by The Dark Knight*

A Militant Meme Coin Dedicated to Flushing Mid Coins & Rugpulls with Extreme Prejudice.

Blockchain: Solana

Ticker: \$TOILET

Total Supply: 1,000,000,000 \$TOILET (At Launch)

Mechanism: Deflationary

Contract Address: FhhdnEM8s9FxC5S2vaedxCrCUdd4XYFz5Zj1NbsHuUNq

TABLE OF CONTENTS

“Hope is a dangerous thing”

- *The Shawshank Redemption*

1. Executive Summary
2. Project Definition
3. Mission Statement
4. The Toiletverse: Lore & Narrative Universe
5. Tokenomics
6. Burn Campaign (“Operation Purge”)
7. Distribution Breakdown
8. Contract Security & Renouncement
9. Staking Structure (Raydium Concentrated Liquidity)
10. Utility (Meme, Gamification & Real Utility)
11. Ecosystem Expansion
12. Roadmap — The Flush Protocol
13. Branding & Visual Identity
14. Team Structure
15. Community Engagement Strategy

16. Risk Disclaimer
17. Final Vision

1. EXECUTIVE SUMMARY

“The greatest trick the devil ever pulled was convincing the world he didn’t exist.”

- *The Usual Suspects*

\$TOILET is a **meme-powered, military-grade satirical operation** built on the Solana blockchain.

Its mission is simple:

Flush the blockchain clean of mid coins, rugpulls, and untrained degenerates — one disciplined flush at a time.

After launching and achieving an early **55x ATH**, the market flushed back down to a **3x consolidation zone** upon which we achieved a **75x**

Most projects die or get rugged here.

\$TOILET did not.

Instead, \$TOILET evolved. literally! From a toilet with toilet paper rolls for eyes, a fedora and an empty toilet roll wedged in the seat, Commander Toilet was born, the unforgiving mascot of Solana’s Anti-Rug Force.

It became a **cultural movement**, a **militarized meme battalion**, and a **toilet-themed resistance force** dedicated to purging crypto’s darkest cesspools.

This whitepaper outlines the entire \$TOILET ecosystem: tokenomics, lore, burns, gamification, real utility, NFTs, merchandising, comics, mobile games, governance satire, and long-term expansion.

2. PROJECT DEFINITION

“When the world tells you to shrink, EXPAND.”

\$TOILET is a meme-powered military operation dedicated to flushing mid coins, rugpulls off the blockchain with extreme prejudice! We bring real utility to the market to prevent serious investors and degens alike from being scammed of their hard earned \$\$\$.

Within 18 months of launch we will introduce the ultimate memecoin incubator, a revolutionary platform designed for fair, transparent and legitimate memecoin launches, because we are all sick and tired of bad actors, scammers and half-assed projects all pulling the rug. The launching of the platform depends on the successful execution of prior phases. We are not here to be polite!

We are here to **declare war on low-effort coins** and build the most **disciplined, unhinged, battle-ready meme community** Solana has ever seen.

We are Solana's one and only Anti-Rug Force, bringing trust back to the memecoin community at large.

3. MISSION STATEMENT

Our mission is to gather every rugged, scarred, and degen-forged survivor and give them the most disciplined, most unhinged, most purpose-driven meme coin ever built — one flush at a time.

4. THE TOILETVERSE: LORE & NARRATIVE

The Toiletverse is a hybrid of:

- **Full military satire**
- **Toilet-themed absurd comedy**
- **Dark humor mixed with iron discipline**

At the center of this universe lies:

- **Commander Toilet** — Commander in Chief of the Anti-Rug Force
- **The Plunger Battalion** — Elite Flush Operations tactical force
- **The Porcelain Council** — Hybrid DAO-style advisory
- **The Porcelain Throne** — Symbol of absolute purification

The Toiletverse is no joke, it is the backbone of future NFTs, comics, mini-games, missions, ranks, and the Flush-to-Earn system.

5. TOKENOMICS

Total Supply: 1,000,000,000 \$TOILET (At Launch)

Buy/Sell Tax: 1.5%/1.5%

Staking: Yes — Staking (Raydium CPMM Liquidity Pools)

Buy & Sell Tax Allocation

\$TOILET implements a modest buy and sell tax designed to support long-term sustainability, community incentives, and ecosystem growth.

All tax allocations are structured, capped, and purpose-driven, ensuring transparency, trust, and disciplined execution.

Tax Distribution Framework

All tax collected is allocated according to the following framework:

5.1 Community Rewards & Incentives — 35%

A significant portion of tax revenue is dedicated directly to the community through

- Holder rewards & giveaways
- Engagement-based incentives
- Mission, participation, and contribution rewards

This allocation reinforces long-term alignment and rewards active members of the Flush Army.

5.2 Operations & Builder Sustainability — 35%

This allocation supports the continued execution and stability of the project, including:

- Core development & infrastructure
- Tooling, security, and moderation
- Operational resources required to maintain momentum

This ensures the project remains sustainable, resilient, and execution-focused over the long term.

5.3 Buybacks & Burns — 10%

Funds allocated here are used for:

- Periodic market buybacks
- Token burns to reduce circulating supply
- Burns will continue until we reach a target of 306,121,988 Token Supply

These actions are executed deliberately and transparently, underpinning supply discipline and long-term value alignment.

5.4 Liquidity Reinforcement — 10%

This allocation is used to:

- Strategically add liquidity to pools
- Locking or burning LP tokens immediately

Strengthening liquidity improves trading efficiency, reduces extreme volatility, and supports healthier market conditions.

5.5 Marketing & Growth — 10%

This portion of the tax is reserved for:

- Strategic marketing initiatives
- Ecosystem integrations & tooling
- Visibility, partnerships, and listings

All marketing spend is intended to be targeted, measurable, and aligned with long-term growth objectives.

Summary of Tax Allocation

Category	Allocation
Community Rewards & Incentives	35%
Operations & Builder Sustainability	35%
Buybacks & Burns	10%
Liquidity Reinforcement	10%
Marketing & Growth	10%
Total	100%

Transparency & Governance

Tax usage is managed with a strong emphasis on clarity, accountability, and discipline, putting the community and longterm investors at the forefront.

Allocations are predefined to avoid discretionary misuse, ensuring all funds directly support the project's long-term mission and community.

6. BURN CAMPAIGN (“OPERATION PURGE”)

At each major market cap milestone, a **0.25% burn or liquidity boost** is executed.

Burn triggers:

- 100K
- 500K
- 1M
- 100M
- 500M
- 1B MCAP

Each burn is executed with full ceremony:

The Flush Horns sound. The Plunger Battalion marches. The blockchain witnesses purification.

Disclaimer: There are two distinct burn mechanisms as outlined in point 5.3 and 6.

Burns are symbolic until the terminal supply of 306,121,988 is reached, at which point no further burns are programmed, but may occur at the developer's sole discretion, with prior notice. Whether the project reaches the terminal supply through “Operation Purge” or by

means of burning coins from the tax pool will entirely depend on market conditions, trading volumes and market cap.

7. DISTRIBUTION BREAKDOWN

Allocation	Percentage	Notes
Liquidity	\$15K locked permanently	Irrevocably locked
Dev Wallet	5.9%	For ongoing operations
Team	5%	For Team related expenses
Treasury	5%	Ecosystem development
Community / Airdrops	5%	Rewards, missions, Flush-to-Earn
CEX Listings	5%	Provision for future CEX Listings
Presale	0%	Fully fair launch
Public Supply	Remaining	Circulating on Solana

Dev: FXBTTvFctmVzeJZXHRRGmFw7juLeb1ZQ3XspEsqRzQu6

Note: Initial allocations fund bootstrapping, while tax allocations fund ongoing operations and growth, making \$Toilet a bluechip memecoin with great potential.

8. CONTRACT SECURITY & RENOUNCEMENT

“Trust but verify.”

- *Ronald Reagan*

Contract Address: FhhdnEM8s9FxC5S2vaedxCrCUdd4XYFz5Zj1NbsHuUNq

Renounced: Yes

Liquidity locked: Permanently

Freeze authority: Revoked

Token metadata: Immutable

Result: Designed to be Unruggable, Unstoppable, Uncloggable.

9. STAKING (RAYDIUM CONCENTRATED LIQUIDITY)

“This is the Way.”

- *The Mandalorian*

\$TOILET uses **Raydium’s CPMM pools** to create a staking environment where holders earn:

- Fee rewards
- Liquidity incentives

- Rank progression in the Toilet Army

The more \$TOILET staked, the higher your **Flush Rank**.

Ranks include:

- Private Plunger
- Sergeant of Sanitation
- Lieutenant of Lavatories
- Colonel of the Commode
- General of the Porcelain Guard

10. UTILITY — MEME , GAMIFICATION & REAL UTILITY

“Discipline is the bridge between goals and accomplishment.”

- *Jim Rohn*

\$TOILET brings the trifecta of meme, gamification and real utility, executed with military discipline.

Flush-to-Earn System

10.1 - Flush-to-Earn Engagement System

The Flush-to-Earn system is a gamified engagement layer within the \$TOILET ecosystem, designed to reward meaningful participation rather than passive speculation.

Instead of idle holding alone, community members can actively contribute to the growth, culture, and visibility of the project through structured activities and missions.

Daily & Ongoing Missions

Participants may complete a variety of rotating missions, including:

- Meme deployment and content creation
- Coordinated community raids and visibility efforts
- Recruitment and onboarding initiatives
- Governance participation and voting operations
- Lore-based quests and narrative progression
- General community engagement and support

These missions are designed to reinforce culture, encourage collaboration, and align incentives between contributors and long-term holders.

Progression & Rewards

Successful participation within the Flush-to-Earn system grants access to:

- Experience Points (XP) used for progression
- Rank advancement within the Flush Army hierarchy
- \$TOILET airdrops tied to activity and consistency
- NFT whitelist access and ecosystem privileges
- Special event access and limited community opportunities

Progression is cumulative and favors sustained contribution over short-term activity spikes.

Toilet Tracker Application

The Toilet Tracker is a lightweight Solana-based tool that provides transparency, gamification, and performance tracking across the ecosystem.

Key features include:

- Buy and sell “flush” activity logs
- Holder streak and consistency tracking
- Global leaderboards ranking participation and engagement

The Toilet Tracker transforms on-chain activity into an interactive experience, reinforcing accountability, competition, and long-term alignment within the community.

10.2 - Commander Toilet: Anti-Scam Ops (2D Game Utility)

As part of the \$TOILET ecosystem, Commander Toilet: Anti-Scam Ops is a 2D action game where players step into the role of Commander Toilet, leading operations against villainous Rug Fraudsters and fake projects across the Toiletverse.

Players complete missions, quests, and combat scenarios while progressing through ranks and XP tiers, unlocking new challenges and enemy classes along the way. Each level introduces increasingly dangerous foes, culminating in boss battles against notorious scam villains.

Gameplay is skill-based and progression-driven, rewarding active participation, mastery, and consistency.

Eligible players can earn \$TOILET tokens through in-game achievements, mission completion, and rank progression.

The game is designed to:

- Reinforce the \$TOILET narrative and lore
- Reward engagement and long-term participation
- Provide entertainment-focused, meme-native utility
- Expand the ecosystem beyond trading alone

Commander Toilet: Anti-Scam Ops transforms the Flush Army from spectators into active participants; combining humor, progression, and rewards in a lightweight, accessible gaming experience.

10.3 - Fair Launch & Supply Custody Platform

As part of the \$TOILET ecosystem, the project introduces a fair launch and supply custody platform designed to address one of the most persistent problems in crypto: centralized control, whale abuse, and rug-pull risk.

The platform provides a structured framework for launching meme-driven and community-led projects using immutable smart contracts, predefined emission schedules, and governed treasury custody. Token supply is secured through non-upgradable contracts, time-based or performance-based release mechanisms, and transparent governance controls — removing discretionary power from any single actor.

By separating ownership, execution, and governance, the platform ensures that no founder, team member, or entity can arbitrarily move funds, unlock supply, or alter token economics without predefined rules, time delays, and collective approval.

This system is designed to:

- Reduce single-actor and whale-driven risk
- Eliminate surprise unlocks and hidden supply movements
- Protect long-term holders through predictable, enforceable rules
- Replace “trust me” promises with on-chain guarantees

The result is a launch and custody framework that prioritizes fairness, transparency, and longevity, enabling projects to grow sustainably while maintaining credibility with their communities, thereby bringing trust and longterm investment to the memecoin space.

11. ECOSYSTEM EXPANSION

\$TOILET will roll out:

A. NFT Collections

- Golden Plungers
- Tactical Toilets
- Porcelain Elite
- Bathroom Banshees

High rarity, low supply, fully gamified.

B. Comics — The Toilet Chronicles

Satire of:

- Rugpull villains
- Market manipulators

- Clueless influencers
- Crypto regulators

C. Merch — Toiletware™

Wearable, premium streetwear-influenced designs.

D. Mobile game “Anti-Scam Ops”

A hyper-casual meme game featuring Toiletverse characters, boss battles, and cosmetic upgrades.

E. ASO Fair Launch Platform: a memecoin fair launch platform using immutable contracts, governed supply custody, and a radar system to flag wallets linked to past rugpulls, reducing scam risk and promoting transparent community-led launches.

12. ROADMAP — THE FLUSH PROTOCOL

“Patience, young grasshopper.”

- *Kung Fu*

The \$TOILET roadmap is built around progressive execution, infrastructure-first development, and ecosystem expansion.

Each phase compounds the previous one, prioritizing longevity, transparency, and real utility over short-lived hype.

Phase I — Operation Flushback

Foundation & Stabilization

Objective: Establish credibility, reinforce infrastructure, and activate the Flush Army.

Key initiatives:

- Community reactivation & onboarding
- Launch of the Flush-to-Earn system (missions, XP, ranks)
- Toilet Tracker MVP (activity logs, streaks, leaderboards)
- Strategic liquidity reinforcement & permanent locking
- Initial burn events under Operation Purge
- Lore expansion & Commander Toilet narrative formalization

This phase focuses on strengthening the base layer of the ecosystem while aligning incentives between holders and active contributors.

Phase II — Operation Sewer Supremacy

Utility Expansion

Objective: Transition from meme-first to utility-backed engagement.

Key initiatives:

- Expansion of Flush-to-Earn missions & reward logic
- Rank-based progression & unlockable privileges
- NFT-based progression elements (status, access, cosmetics)
- Early development & testing of Commander Toilet: Anti-Scam Ops (2D game)
- Anti-rug education, reporting initiatives, and community-led ops

This phase deepens engagement and introduces interactive utility beyond trading alone.

Phase III — Operation Unclog the World

Ecosystem & Brand Expansion

Objective: Extend \$TOILET beyond on-chain activity into culture and brand.

Key initiatives:

- Official \$TOILET Merchandise — Toiletware™
- Limited-run, premium apparel & accessories
- Utility tie-ins with ranks, NFTs, and events
- Expanded NFT collections tied to lore and progression
- Continued development & public release of Commander Toilet: Anti-Scam Ops
- Broader visibility initiatives & ecosystem partnerships

Merchandise is a permanent pillar of the \$TOILET roadmap, reinforcing identity, culture, and community cohesion.

Phase IV — Operation Porcelain Dominion

Infrastructure & Longevity

Objective: Build systems that outlast market cycles.

Key initiatives:

- Inception of the Fair Launch & Supply Custody Platform
- Immutable smart contract launches
- Predictable emission schedules
- Governed treasury custody
- Hybrid governance framework — The Porcelain Council
- Expansion of the Toilet Tracker into a full ecosystem dashboard

- Long-term tooling, reporting, and transparency infrastructure

This phase positions \$TOILET as a credible anti-rug ecosystem, not just a meme project.

Roadmap Philosophy

The Flush Protocol is guided by the following principles:

- Infrastructure before hype
- Predictability over surprise
- Engagement over speculation
- Transparency over trust assumptions

Execution is prioritized over rigid timelines.

Features are deployed when they are stable, secure, and aligned with the long-term vision.

13. BRANDING & VISUAL IDENTITY

“You’re either somebody... or you’re nobody.”

- *Scarface*

- **Minimalistic clean** (for the whitepaper & institutional sections)
- **Degenerate chaotic** (for meme deployment)
- **Tactical military aesthetic** (for ranks, uniform designs, NFT theematics)
- **Cartoonish meme style** (for comics, animated shorts)

14. TEAM STRUCTURE

“A chain is only as strong as its weakest link.”

- *Patton*

- **Commander-in-Chief** — Owner/Dev
- **Shitposting Commander** — Overseer of Meme Warfare
- **Meme Operations General** — Offensive strategy & propaganda
- **Supreme Lieutenant of Flush Intelligence** — Community analytics
- **Chief Plunger Engineer** — Systems, tooling, staking logic
- **Director of Degen Morale & Troop Hype** — Community engagement lead

15. COMMUNITY ENGAGEMENT STRATEGY

“We’re all in this together.”

- *Black Hawk Down*

The Toilet Army thrives through:

- Daily memes
- Weekly events
- XP/rank progression
- Seal Team 6-tier shitposting
- Influencer shockwaves
- Lore content
- Missions and operations
- Toiletverse storytelling

Community is not an afterthought — it *is* the weapon.

16. RISK DISCLAIMER (SERIOUS... BUT NOT TOO SERIOUS)

\$TOILET is a meme-driven digital token created for entertainment, community engagement, and experimental utility. It is not a security, investment contract, or financial instrument, and it carries no guarantee of profit, value, or future performance.

Participation in the **\$TOILET** ecosystem involves risk. Market volatility, liquidity changes, smart contract interactions, and broader crypto market conditions may result in partial or total loss of funds. You should never deploy capital you are not prepared to lose.

While **\$TOILET** is built with transparency, renounced contracts, and locked liquidity, no blockchain system is entirely risk-free. Users are responsible for conducting their own research, verifying information, and understanding how decentralized systems operate.

Nothing in this whitepaper constitutes financial, legal, or investment advice. This document is a satirical manifesto outlining a meme-powered ecosystem with gamified elements and experimental features.

In simple terms:

This is crypto.

It's volatile.

It's chaotic.

And sometimes, it's messy.

If you're here expecting certainty, you're in the wrong bathroom.

If you understand the risks and still choose to proceed.

Welcome to the meme war and let's write history together, shall we?

17. FINAL VISION

\$TOILET exists to bring together every battle-scarred degen who has been rugged, misled, or left holding the bag, and give them a place to regroup, rebuild, and fight back. Crypto is a battlefield ~~X~~, and most losses don't come from stupidity but from bad actors gaming the system. This is where survivors turn experience into discipline and chaos into coordination.

As they say, "What we do in life echoes in eternity."

In our case, it echoes on-chain.

At its core, **\$TOILET** is building a fair launch ecosystem  designed to raise standards across the memecoin space. Through immutable contracts, transparent emissions, governed supply custody, and a radar system that flags wallets linked to past rugpulls, the project aims to stop repeat offenders before damage is done. This isn't about gatekeeping or control, but about making scams harder to run and honesty easier to verify. Or, as a certain commander once put it, "Trust, but verify."

Alongside this infrastructure, **\$TOILET** turns participation into play. Through Flush-to-Earn mechanics, ranks, missions, and Commander Toilet: Anti-Scam Ops, community members don't just hold tokens, they progress. Engagement earns rewards, loyalty unlocks status, and contribution moves you forward. Fighting scams should feel less like unpaid emotional labor and more like a game you actually want to play.

The long-term vision is simple. **\$TOILET** aims to become the safest gathering place for degens, the most disciplined meme ecosystem on Solana, and the loudest enemy of rugs, scams, and fake projects. We're not here to impress VCs or blend into the background.

We're not here to save the world.

We're here to flush it clean.

One flush at a time.

One mission at a time.

One degen at a time.

Welcome to **\$TOILET**.

Welcome to the **#FlushArmy**

"We don't blend in. We flush through!"

- *Toilet Doctrine*
